To Whom It May Concern,

Ecolab and POS partner together to provide clean textiles for food processing customers. Ecolab sales and service managers help to manage the laundry chemistry and laundry wash formulas that are programmed in the laundry machines utilized to wash the textiles at POS facilities. Formulas utilized by POS to process food (HACCP) garments utilize AdvaCare Disinfectant, an Environmental Protection Agency (EPA) registered laundry disinfectant, EPA Registration Number 1677-193. AdvaCare Disinfectant is approved for use in commercial, institutional, healthcare, and industrial laundry applications.

The wash formulas utilized for processing food (HACCP) garments meet the laundry disinfection requirements for the EPA registration guidelines for AdvaCare Disinfectant with a usage rate of 4 oz per hundred rate of laundry at 140°F for 5 minutes of contact time in the laundry. Per the Ecolab Regulatory Letter dated January 10, 2020, AdvaCare Disinfectant 2020_10, AdvaCare Disinfectant utilized at a disinfection level of 4 oz per hundred pounds of laundry, the formulation meets the EPA requirements for laundry disinfection (complete kill) for ten different microorganisms.

- Staphylococcus aureus
- Klebsiella pneumoniae
- Pseudomonas aeruginosa
- Methicillin-resistant Staphylococcus aureus (MRSA)
- Methicillin-resistant Staphylococcus aureus (CA-MRSA)
- Acinetobacter baumannii
- Listeria monocytogenes
- Escherichia coli 0157:H7
- Salmonella enterica
- HIV-1 Virus

Please contact me with any questions.

Sincerely,

Angela Becker Nick Wagner Marne Rasinen
